CENTER COURT™ SUPPORTS DB2 DATABASE ENVIRONMENT

Web-based Calendaring and Scheduling Software for the Judicial Courts

Dayton, New Jersey: November 1, 2004

As a leading provider of judicial applications and services, Levare announced today the general availability of Center Court™ for a DB2 database environment. Providing an automated judicial calendaring and scheduling solution, Center Court™ enhances the process of scheduling any judicial event for a Judge, location and court.

Center Court™ is available in a Windows, Linux or UNIX environment and can be easily integrated into any E-Government portal or case management system. Plumtree version 5.0 is supported. Full database support for Oracle, SQL Server, MySQL and DB2 is available.

Center Court™ is flexible, web-based software that provides an easy-to-use method for scheduling hearings, motions, trials and judicial events. It can effectively manage the most strenuous docket for any criminal, civil, probate, family, juvenile or traffic court. It's rich feature-set includes multiple calendar views, available time slot search, calendar blocking, conflict resolution, email notification of events, rescheduling or canceling of events, user defined fields, calendar set-up wizard, customizable case-number format, role-based security and customizable calendar reports with export facility to Excel, Word or PDF. The Calendar *DASHBOARD* provides quick and easy access to all scheduled events and alerts. Center Court™ can streamline the scheduling process, increase court staff productivity and keep all calendars up-to-date.
