Levare, Inc. Announces Strategic Reseller Partnership with Cybercon to Add Real-Time Web Conferencing Services to its WebMIS Suite

Iselin, New Jersey: May 3, 2004

Levare, Inc., a technology solutions provider and leading developer of robust business applications and custom software, today announced that Cybercon will provide hosted web conferencing services under their WebMIS suite of products. Antarya Boardroom has been custom-tailored to fit within Cybercon's service delivery model, and will now be available to Cybercon's current customer base as a hosted service.

Cybercon is a world-leading provider of data center infrastructure, eBusiness and IT services. "This partnership is exceptionally complementary," stated Charles Callari, COO of Levare. "Naturally we are excited about increasing the scope of our partner universe, but more importantly, we are extremely pleased with the impressive reputation for quality service delivery that Cybercon brings to the table."

Tim Ceradsky, Director of Sales of Cybercon, said they selected Levare because its business model relies on partnering closely with clients to provide long-term satisfaction and value. "Our partnership with Levare melds nicely with our strategic plan to increase revenue via new product and services avenues and keep up with customer demand. This relationship enables us to add value to all our solutions and further serve our valued clientele. It will cut heavily into the lion's share of the market due to its high-end functionality and low cost entry point. We anticipate a 20% increase in revenue this year from web conferencing services alone."

Antarya Boardroom incorporates "best-of-breed" technology that provides customers with an intuitive approach to sharing and collaborating on information in real-time. Sales presentations, user desktops and software applications can be easily shared through Antarya Boardroom. Complimentary functionality includes text chat, VOIP, file transfer and unique *emoticons* that easily add humor to any meeting that calls for it. "We are excited to be offering this real-time collaboration and web conferencing technology to our financial, healthcare, government and commercial clients as it meets specific business challenges that we see them facing. No other web conferencing software provides such an intuitive user interface with high-end functionality at such a cost-effective price," states Charles Callari, COO of Levare. "Our continued success is a result of the increasing demand for innovative software designed for today's complex corporate environment, where the ability to produce rapid, consistent and measurable results carries the day."
