For Immediate Release

**LEVARE A MEMBER OF IBM PARTNERWORLD PROGRAM AND CERTIFIED UNDER
CHIPHOPPER PROGRAM FOR CENTER COURT™ AND DB2 FOR JUDICIAL SCHEDULING
AND CALENDARING FOR THE COURTS**

Web-based Calendaring and Scheduling Software for the Judicial Courts

Dayton, New Jersey: June 30, 2006

As a leading provider of judicial applications and services, Levare announced today that it has worked closely with IBM to become a member of the IBM PartnerWorld Program. Levare will continue to work IBM to obtain advanced level membership in the program with the successful completion of the implementation of Center Court™ throughout the Commonwealth of Virginia. Levare will implement a customized version of its software across all Circuit Courts throughout Virginia over an 18 month period. Phase two of the implementation may include the rollout of Center Court™ to the General District Courts and the Juvenile and Domestic Relations Courts.

IBM Systems Application Advantage for Linux – Chiphopper – is a no-charge offering for IBM Business Partners that is designed to assist ISVs in porting, testing, and supporting their existing Linux x86 applications on Intel to IBM Systems and middleware platforms. It's called Chiphopper because of its capability for allowing applications to easily move, or "hop," across various chips.

Levare is better positioned to aggressively meet client requirements through our new relationship with IBM as a Business Partner and as a member of the PartnerWorld Industry Networks for government and healthcare and life sciences.

Providing an exclusive automated judicial calendaring and scheduling solution, Center Court™ enhances the process of scheduling any event for a Judge, location and court. With the customized integration to the existing mainframe Case Management System operating in a Linux/DB2 environment, Center Court™ will provide a central repository for all scheduled events for the Virginia Circuit Courts.

Center Court™ is flexible, web-based software that provides an easy-to-use method for scheduling hearings, motions, trials and judicial events. It can effectively manage the most strenuous docket for any criminal, civil, family, juvenile or traffic court. It's rich feature-set includes a master calendar design, multiple calendar views, available time slot search, calendar blocking, conflict resolution, email notification of events, rescheduling or canceling of events, user defined fields, calendar set-up wizard, customizable case-number format, role-based security and customizable calendar reports with export facility to Excel, Word or PDF. The Calendar *DASHBOARD* provides quick and easy access to all scheduled events and alerts. Our latest version includes the ability to download a Judges calendar to a PDA device and provide a view of any calendar via the Internet for the public. Center Court™ can streamline the scheduling process, increase court staff productivity and keep all calendars up-to-date.
