For Immediate Release

MAJOR INTERNATIONAL MINISTRY CONTRACTS WITH LEVARE FOR CUSTOMIZED EVENT MANAGEMENT, INVENTORY CONTROL, WAREHOUSING, ORDER MANAGEMENT, RMA, SHIPPING, CUSTOMER SERVICE AND E-COMMERCE SOLUTION

Dayton, New Jersey: March 22, 2005

As an emerging provider of browser-based supply chain management and e-commerce solutions, Levare announced today the agreement to provide its iCORE software to Ambassadors Ministries International with locations in Germany and Florida. iCORE will be co-located in both locations to aid with event registration and order processing. iCORE, the complete Order-To-Delivery e-commerce software, is solely tailored to the Small Business Enterprise market and cost-effectively priced. iCORE was customized and enhanced specifically to fit the AMI organization.

With our latest release, iCORE increases functionality to include the integration to any backend accounting software such as QuickBooks. Existing web sites can also be integrated for cost-effective order processing and management. iCORE is positioned to be a one-stop-software-shop for inventory control, warehousing, order management, shipping, returns authorization, customer service and complaint tracking, purchase orders, customer contact management and reporting. The executive decision *DASHBOARD* provides key users with low inventory, back-order and new order alerts in real-time. Total implementation and full-operation can be accomplished within weeks.

The CEO and President of AMI, Marcus Greiger, confirms that the major reason iCORE will be implemented is for improved event coordination and management, and better product delivery for its valued patrons.

Pricing and Availability

iCORE Version 2.0 is available immediately. Several individual, corporate and service provider pricing plans are available. Software licensing and VAR options are available, as well as web site integration and professional services. Please contact Levare for custom pricing information.
